# PHOENIX II

## Phlebotomy Chair

**THE PHOENIX II** is a user-friendly phlebotomy chair that offers comfort, quality and durability all wrapped into a sleek European design. Continued advancements over its 40+ year history have helped to make the Phoenix II our most popular selling phlebotomy/apheresis chair both here in North America and in Europe. The “either-side operation” of this manually operated chair allows the seat to be easily positioned at any point along the chairs glide path from upright to Trendelenburg in seconds. The classic set of multi-positioning armrests will raise, lower, tilt and turn. They even move back allowing for easy ingress and egress.

**STRUCTURE, COMFORT & SAFETY** Heavy steel frame construction provides maximum strength and support for durability and decades of continual use. Front leg leveling pads and rear leg wheels allow for balance and easy movement. The upholstery consists of hi-grade comfort foam and premium medical grade vinyl in a variety of colors, all which meet the most stringent fire code and durability standards. Weight capacity 435 lbs./197 kg.

**WARRANTY** We provide a lifetime warranty on the frame and a 3-year comprehensive warranty on parts and craftsmanship under normal use. The best in the industry!

*Product designs are subject to change without notice*

# PHOENIX II

## Phlebotomy Chair

**THE PHOENIX II** allows the donor to comfortably sit in a natural upright position while offering deep Trendelenburg positioning.

Smart engineering allows each of the three custom upholstery cushions to easily be replaced with the use of a single wrench.

### EXTRAS

We include spare parts! Brake stop and brake pedal pads. Not that you will ever need them but it's always nice to know that you have extras.

### NO ASSEMBLY REQUIRED

Each Phoenix II is thoroughly tested prior to shipping and comes completely assembled and ready to use.
